

83

Code: ECON-420

Title: World Economic History

Credit Hours: 03

Prerequisite: Intermediate Microeconomics and Intermediate Macroeconomics

Objectives:

This course surveys the history of colonial expansion from the discovery of the Americas up to the colonization of the Middle East following the end of the First World War. The course is intended to give students a chronological account of the rise of imperialism and the colonial expansion into Latin America, Asia and Africa. While emphasis is placed on social, political and economic developments within the European nations which prompted colonial expansion, the primary focus is on how the actual colonies were acquired and the subsequent changes that took place. The course attempts to provide an essential background to understanding the historical processes by which modern developed nations became developed, and how the underdeveloped "Third World" originated as part of the same historical process

Course Contents

Introduction

What is Economic History? What is World Economic History?, Why study World Economic History
