					, . 1. C		
c. stratified random sample.			stratified random sample.				
d. probability sample.							

- 6. In a cross sectional research, data is collected on different variables
- a. In a sequence with independent variable is measured before dependent variable
- b. At different points of time.
- c. In a sequence with dependent variable is measured before independent variable
- d. at one point of time.
- 7. A Research starts with hypothesis is
- quantitative and exploratory.
- b. qualitative and exploratory.
- c. quantitative and confirmatory.
- d. qualitative and confirmatory
- 8. Which of the following ethical issues is considered important when researchers conduct research on the Internet?
- a. secondary sources
- b. privacy and confidentiality
- c. providing assent to participate
- d. debriefing
- 9. According to publication manual of the American Psychological Association list of references is given in
- a. in the same sequence as in text.
- b. Alphabetically
- c. from earlier to recent years of publication
- d. randomly
- 10. When using a direct quote (exact words) from a source, it is appropriate to
- a. cite the source with the quote.
- b. use quotation marks around the quoted material.
- c. cite the source at the end of the paragraph.
- d. (a) and (b)

# UNIVERSITY OF THE PUNJAB

Fifth Semester – 2019
Examination: B.S. 4 Years Program

PAPER: Research Methods-I Course Code: APSY-356 Part - II

Roll No.	
NAAN TITRATI. A YE 45 Min.	

MAX. TIME: 2 Hrs. 45 Min.

MAX. MARKS: 50

### ATTEMPT THIS (SUBJECTIVE) ON THE SEPARATE ANSWER SHEET PROVIDED

### Q.2. Write short answers to the following questions.

(4x5=20)

- 1. Differentiate between grounded theory and interpretative phenomenology?
- 2. Differentiate between independent and dependent variables.
- 3. What is theoretical frame work for a research
- 4. What does APA's code of ethics say deception?
- 5. Differentiate between directional and non-directional hypotheses

## Q.3. Write long answers to the following questions.

(3x10=30)

- 1 Discuss non probability sampling techniques.
- 2 Explain experimental method of research
- .3. Explain limitations of scientific research
