SUMMARY

A positive thinking, mature, enthusiastic and a reliable gentleman. Ever ready for any assigned task. A challenging & demanding environment favors my professional capabilities. My interest in the field of research and science developed whilst my pharmacy degree. Apprenticeship and work experience in pharmaceutical marketing provided me an opportunity to clear my concepts and boosted my interest and confidence in this field. During my PhD and M. Phil and research projects I have learned the necessary expertise of up-to the minute tools of drug development. I have worked on various characterization techniques including X-ray diffraction techniques, HPLC, Mass Spectroscopy and IR, etc. Looking forward for an opportunity to make a major contribution to higher education institutes in Pakistan. For the past few years actively involved in research, teaching and other academic activities at undergraduate as well as postgraduate level. I am also involved in various managerial tasks at department and University level.
