First Semester 2018 Examination: B.S. 4 Years Programme

PAPER: General Methods of Teaching Course Code: EDU-101 TIME ALLOWED: 30 mins. MAX. MARKS: 10

Attempt this Paper on this Question Sheet only.

Q1. Encircle the correct option.

- 1. Method is based on the facts that students learn association, activity and cooperation is known as
 - (a) Demonstration
 - (b) Project
 - (c) Problem- solving
 - (d) discussion
- 2. The most direct experience from the following is that of
 - (a) Motion pictures
 - (b) Visual symbol
 - (c) Demonstration
 - (d) field trip
- 3. Mock up models are those which explain
 - (a) Principles or working of machine
 - (b) Internal structure
 - (c) External structure
 - (d) None of above
- 4. How much knowledge is gained through the sense of listening?
 - (a)75%
 - (b) 13%
 - (c) 6%
 - (d) 3%

5. Which is more suitable method in teaching of science?

- (a) Lecture method
- (b) demonstration method
- (c) Discussion method
- (d) Project method
- 6. What is the tic of presentation in Micro teaching?
 - (a) 1-5 min
 - (b) 5-10 min
 - (c) 10-15 min
 - (d) 15-20 min
- 7. CAI stands for
 - (a) Computer analyzed instruction
 - (b) Computer assisted instruction
 - (c) Computer assisted interview
 - (d) Computer analyzed interview
- 8. Which is not the advantage of team teaching
 - (a) Better utilization of resources
 - (b) Better planning
 - (c) Better use of teaching techniques
 - (d) Better financial benefits of teachers
- 9. Symposium is a type of
 - (a) Discovery method
 - (b) Discussion method
 - (c)Lecture method
 - (d) Demonstration method
- 10. Explanatory methods are used in?
 - A. Subject centered curriculum
 - B. Learner centered curriculum
 - C. Activity centered curriculum
 - D. None

Question #: 2 Explain in your words ONE of the following stanzas with reference to the context. (10 Marks)

a. And it grew both day and night.Till it bore an apple bright.And my foe beheld it shine,And he knew that it was mine.

b. Storm, blow me from here
 With your fiercest wind
 Let me float across the sky
 Till I can rest again.

Question #: 3 Write the critical appreciation of the poem 'The Rebel' (D. J Enright) by focusing on the satirical elements used by the poet.

OR

Write a detailed summary of the poem 'Kubla Khan' (S.T. Coleridge). (10 Marks)

Question #: 4 Read the passage carefully and answer the questions given below it. $(3 \times 5 = 15)$

The other day we heard someone smilingly refers to poets as dreamers. Now, it is accurate to refer to poets as dreamers, but it is not discerning to infer, as this person did, that the dreams of poets have no practical value beyond the realm of literary diversion, the truth is that poets are just as practical as people who build bridges or look into microscopes; and just as close to reality and truth, where they differ from the logician and the scientist is in the temporal sense alone; they are ahead of their time, whereas logicians and scientists are abreast of their time. We must not be so superficial that we fail to discern the practicableness of dreams. Dreams are the suprise streamers

(P.T.O.)

heralding a new day of scientific progress, another forward surge. Every forward step man takes in any field of life, is first taken along the dreamy paths of imagination. Robert Fulton did not discover his steamboat with full steam up, straining at a hawser at some Hudson River dock; first he dreamed the steamboat, he and other dreamers, and then scientific wisdom converted a picture in the mind into a reality of steel and wood. The automobile was not dug out of the ground like a nugget of gold; first men dreamed the automobile and afterward, long afterward, the practical-minded engineers caught up with what had been created by winging fantasy. He who looks deeply and with a seeing eye into the poetry of yesterday finds there all the cold scientific magic of today and much which we shall not enjoy until some tomorrow. If the poet does not dream so clearly those blueprints of this vision can immediately be drawn and the practical conversions immediately effected, he must not for that reason be smiled upon as merely the mental host for a sort of harmless madness. For the poet, like the engineer, is a specialist. His being, tuned to the life of tomorrow, cannot be turned simultaneously to the life of today. To the scientist he says, "Here, I give you a flash of the future." The wise scientist thanks him, and takes that flash of the future and makes it over into a fiber of today.

1. Are poets dreamers? In what sense?

2. Are dreams, according to the author, useful to the world? Why?

3. What was Fulton's achievement?

4. If the poet did not dream, what would happen?

5. In what way is the poet a specialist?

Question #: 5 Give a short summary of the above paragraph and also give a suitable title to it. (10 + 5 = 15)

Attempt this Paper on this Question Sheet only. OBJECTIVE TYPE

Q: No: 1, Select the most appropriate answer from the following. $(1 \times 10 = 10)$

- 1. The primary aim of educational psychology is
 - a) To contribute to an understanding of sound educational practices.
 - b) To provide the teacher with a greater appreciation of his role in the education of the child.
 - c) To provide the academic background essential for effective teaching.
 - d) To provide a theoretical framework for educational research
- 2. General Psychology and Educational Psychology are dissimilar, in that educational psychology
 - a) Is concerned with the child and not with the adult.
 - b) Is concerned with the various aspects of learning.
 - c) Deals only with the applications and not with the theory.
 - d) Selects and emphasise certain data from general field
- 3. The primary task of the teacher is
 - a) To teach the prescribed curriculum.
 - b) To stimulate and guide student learning.
 - c) To promote habits of conformity to adults demands and expectations.
 - d) To provide diagnostic and remedial aid wherever indicated

P.T.O.

- 4. Can we predict development?
 - a) Yes
 - b) No
 - c) Don't knows
- 5. The real carriers of heredity are
 - a) The chromosomes.
 - b) The genes.
 - c) The nucleus of the cell.
 - d) The 'X' and 'Y' chromosomes
- 6. Which of the following is not a stage in the information-processing model of memory?
 - a) Short-term-memory
 - b) Long-term-memory
 - c) Episodic memory
 - d) Sensory memory
- 7. Working memory is a special function of
 - a) The sensory register
 - b) Short-term memory
 - c) Long-term memory
 - d) Any of the above
- 8. The phone number discussed in question 5 probably could have been remembered for a longer period if you had practiced
 - a) Chunking
 - b) Repression
 - c) Rehearsal
 - d) A and C
- 9. The type of remembering necessary to correctly answer this multiple choice question is
 - a) Recall
 - b) Recognition
 - c) Relearningd) Rehearsal
 - d) Renearsat
- **10.** The theory of forgetting that suggests that the conscious mind pushes information into the unconscious is called

· · --

- a) Decay
- b) Schema theory
- c) Interference
- d) Repression

Fifth Semester 2018 Examination: B.S. 4 Years Programme

PAPER: Educational Statistics Course Code: EDU-318

TIME ALLOWED: 30 mins. MAX. MARKS: 10

Attempt this Paper on this Question Sheet only. OBJECTIVE TYPE

Q.1: Some possible answers are given for each of the followings. Encircle the correct answer. Cutting and overwriting is not allowed.

i) Which of the following divides a group of data into two subgroups?
a. Median
b. Quartile
c. Percentile
d. Variances
ii) The number of accidents in the city of Gujranwala during year 2017 is
a. Continuous variable
b. Discrete variable
c. Qualitative variable
d. Intervening variable

iii) The first hand and unorganized form of data is called

a. Original data b. Secondary data c. Primary data d. True data

iv) The arithmetic mean of the two numbers X₁ and X₂ is 20. If each number is first multiplied by 2 and then increased by 5, then what is the mean of new numbers?

a. 42.5 b. 100 c. 40 d.45

v) If the mean of some items is Rs.20 and standard deviation is Rs.10, then coefficient of variation is

a. 45% b. 50% c. 60% d. 65%

vi) The measurements of spread or scatter of the individual values around the central point is called

a. Measures of dispersion b. Measures of central tendency c. Measures of skewness d. Measures of kurtosis

vii) The measure of dispersion which uses only two observations is called

a. Mean b. Median c. Range d. Variation

viii) The positive square root of variance is called

a. Quartile b. Range c. Standard deviation d. Coefficient of variation

ix) Ten schools have an average of 2 science teachers. How many science teachers do they have together?

a. 2 b. 10 c. 20 d. 12

x) If Y = 10.5 + 6.3X, then the value of regression co-efficient is

a. 16.8 b. 0 c. 10.5 d. 6.3

SECTION I

Q.2: SOLVE THE FOLLOWING QUESTIONS. EACH QUESTION CARRY TWO MARKS. (2 ×10=20)

i. Differentiate between Mean, Median and Mode with examples.

ii. Define Range, Variance and Standard Deviation.

iii. Differentiate between directional and non-directional hypothesis with examples.

iv. Differentiate between Primary data and Secondary data.

- v. The number of tornadoes that have occurred over an 8-years period are 684, 764, 656, 702, 856, 1133, 1132, 1303. Find the median.
- vi. What is the importance of Coefficient of Variance (C.V)?

vii. Define Type-I and Type-II error.

Viii. Distinguish between Skewness and kurtosis.

ix. What is meant by regression equation?

x. How the value of Pearson Product Moment correlation co-efficient is interpreted? Briefly describe with examples.

SECTION II

Solve the following questions. $(3 \times 10 = 30)$

Q. 3. The data given below represents the record highest temperatures in degree Fahrenheit (°F) of different cities of Punjab. Construct a frequency distribution table for the data by using 7 classes.

112, 110, 107, 116, 120, 100, 108, 112, 108, 113, 127, 117, 114, 110, 120, 120, 116, 115, 121, 117, 134, 118, 118, 113, 105, 118, 122, 117, 120, 110, 105, 114, 118, 119, 118, 110, 114, 122, 111, 112, 109, 105, 106, 104, 114, 112, 109, 110, 111, 114

Q.4. Sara and Javeria are two students of B.S 4 year's program. Their Marks in eight classroom quizzes of Educational Statistics are given in the following table. Compute the Coefficient of Variation for the marks of Sara and Javeria and compare the results.

Marks of Sara	86	87	81	80	89	84	85	84
Marks of Javeria	74	74	72	79	88	71	87	72
			···					لــــــ

Q.5. Find the relationship between the scores of the following two subjects by calculating Pearson Product Moment correlation co-efficient. Also write your decision about the relationship.

Mathematics	5	6	8	10	12	13
Statistics	2	5	3	8	7	9

Q. 1

(10x1=10)

- 1. The application of the scientific method to the study of educational problems is called
 - A. Inductive reasoning
 - B. Deductive reasoning
 - C. Educational research
 - D. Grounded theory
- 2. Which of the following designs studies causal relationships?
 - A. Descriptive
 - B. Correlational
 - C. Experimental
 - D. Narrative

3. Which of the following is an excellent source for selecting a research topic?

- A. Theory
- B. Personal experience
- C. Replication of prior research
- D. Library searches

4. Which one of the following would be MOST appropriate synonym for the dependent variable?

- A. Outcome variable
- B. Response variable
- C. Effected variable
- D. Experimental variable

5. When a principal selects a sample of 30 subjects from each of the grades in her school, she is likely using which type of sampling technique?

- (a) Random
- (b) Proportional stratified random
- (c) Non-proportional stratified random

(d) Cluster

6. Designs which provide control approximately over all sources of internal and external invalidity are referred to as:

- A. Pre-experimental designs
- B. True experimental designs
- C. Quasi experimental designs
- D. Single group designs

(P.T.O.)

TIME ALLOWED: 15 Min. MAX. MARKS: 10

- 7. The best way to control for extraneous variables in research studies is
 - A. Randomization
 - B. Valid and reliable instrumentation.
 - C. Avoiding all threats to external validity.
 - D. Using intact groups.

8. Experimental research differs from other types because in experimental research:

- A. The dependent variable must be measured precisely
- B. The independent variable must be manipulated
- C. Groups are compared
- D. There are no extraneous variables

9. The process of selecting a number of individuals for a study in such a way that the individual represents the larger group is referred to as:

- A. Sampling
- B. Random sampling

C. Convenient sampling

D. Cluster sampling

10. Which of the following is a question of internal validity in experimental research?

- A. How widely can the results of the experiment be generalized?
- B. Has maturation influenced the dependent variable?
- C. Was the sample representative of the population?
- D. Will replication in another setting result in the same findings?
