
PUBLICATIONS

A. Noor, **M. S. Akram**, L. Ahmed & W. Sarwar (2017). Back analysis of an earthquake triggered landslide in Mansehra district, Pakistan. *Journal of Himalayan Earth Sciences*, 50, No. 1A, pp. 86-99.

M. S. Akram, S. Farooq, M. Naeem & S. Ghazi (2016). Prediction of mechanical behavior from mineralogical composition of Sakesar limestone, Central Salt Range, Pakistan. *Bulletin of Engineering Geology and the Environment*, Published online (DOI 10.1007/s10064-016-1002-3)

M. S. Akram, M. Zeshan (2016). Geotechnical assessment for weir foundation incorporating rock mass rating (RMR) and geological strength index (GSI) classification systems of a small hydropower project, district Shangla-Pakistan. *Science International Journal* 28, (6), pp.5111-5114

I. Ali, **M. S. Akram** & K.Mirza.(2014). Lineament Study of Kandiah Valley, Kohistan District, NW Pakistan. *The Nucleus*, 52, No. 4.

Kamran Mirza, Shahid Jamil Sameeni, **M. Sohail Akram** and *Aamir Yasin (2014). Nummulites from the Kohat Formation, Northern Kohat Basin, Himalayan Fold and Thrust Belt, Northern Pakistan. *Sci. Int.*, 26(5), 3039-3043, 2014.

Akram. M. S, Azhar. M.U, Farooq. S (2014). Prediction of Uniaxial Compressive Strength (UCS) of Sakesar Limestone in Salt Range - Pakistan by Indirect Methods. *International Journal of Advanced Information Science and Technology IJAIST-22*.

Akram, M. S., Sharrock, G. and Mitra, R. (2011). Physical and numerical investigation of conglomerates. *2nd International FLAC/DEM Symposium, February 14-16, 2011*, Melbourne, Australia.

Akram, M. S., Sharrock, G. and Mitra, R. (2011). The role of interstitial cement in cemented spheres. *2nd International FLAC/DEM Symposium, February 14-16, 2011*, Melbourne, Australia.

Akram, M.S. (2010). Physical and numerical investigation of conglomeratic rocks. (Ph.D. Thesis). School of Mining Engineering, The University of New South Wales, Sydney, Australia.

Akram, M. S. and Sharrock, G. (2010). Physical and numerical investigation of a cemented granular assembly of steel spheres. *Int. J. Numer. Anal. Meth. Geomech.* 34 (18): 1896-1934. DOI: 10.1002/nag.885.

Akram, M. S. and Sharrock, G. (2009). Physical and numerical investigation of a cemented granular assembly under uniaxial and triaxial compression. *The 43rd US Rock Mechanics Symposium and 4th U.S. - Canada Rock Mechanics Symposium June 28 - July 1, 2009*, Asheville, ARMA09-024 (CD-ROM), Paper No. 24.

Sharrock, G.B., **Akram, M.S.** and Mitra, R. (2009). Application of synthetic rock mass modeling to estimate the strength of jointed sandstone. *The 43rd US Rock Mechanics Symposium and 4th U.S. - Canada Rock Mechanics Symposium June 28 - July 1, 2009*,

Asheville, ARMA09-059 (CD-ROM), Paper No. 59.

Akram, M.S. (2001). Geotechnical & Geophysical Studies of Landslides along Murree - Ayubia Road & Partsan village, District Chitral. (M.Sc Thesis), *Institute of Geology, University of the Punjab*, Lahore, Pakistan.
