---|----------------|
1   | Business Administration, Commerce

**Business:** Meaning, Nature, Scope and Importance. Problems, Functions and Qualities of a Businessman, Types of Businesses.

**Sole Proprietorship:** Features, Importance, Merits and Demerits.

**Partnership:** Features, Merits and Demerits, Co-ownership Vs. Partnership; Classification of Partners; Rights, Duties and Liabilities of Partners, Dissolution of Partnership.

**Joint Stock Company:** Features, Merits and Demerits, Formation, Memorandum of Association; Articles of Association, Prospectus, Capital, Management, Meetings, Winding up.

**Cooperative Society:** Features, Kinds, Merits and Demerits.

**Combination:** Meaning, Causes and Purposes, Advantages and Disadvantages. Types of Combination. Forms of Combination.

**Trade:** Wholesales, Retail, Import and Export. Export Promotion Bureau and its role.

**Marketing Operation:** Definition, Functions, Scope Advantage and Disadvantage, Marketing Versus Selling.

**Channels of Distribution:** Meaning, Functions, Kinds, Selection of Channels, Advantages.

**Sales Promotion:** Meaning, Objects and Methods.

**Advertising:** Meaning, Objects, Types, Merits and Demerits Advertising Media.

**Warehousing:** Definition, Functions, Kinds.

**Business Risk:** Definition, Types, Methods of Handling Risk.

**Insurance:** Meaning, Principles, Kinds (Life, Fire, Marine) Importance.

**Recommended Books:**

Note: Latest Editions of the recommended books may be included.
1. **Introduction to Management**  
   Theory versus Practice  
   Evolution  

2. **Decision Making**  
   a. Theory in Decision Making  
   b. Decision Making in Practice  

3. **Planning**  
   a. An Overview of Planning  
   b. Strategy Formation  
   c. Management  

4. **Organizing**  
   a. Organizing Structure  
   b. Authority  
   c. Staffing the Organization  
   d. Organizing for Maximum Performance  

5. **Leading**  
   a. Motivation  
   b. Leadership and Supervision  
   c. Management Change  
   d. Communication and Conflict  

6. **Controlling**  
   a. An Overview of Control  
   b. Control Techniques  

7. **Conclusions**  
   A Look Back and a Look Ahead

- Man studies himself
- The biological basis of behavior
- The development of behavior
- Clinical approaches to a personality
- Psychometric approaches to personality
- Defining and measuring learning and retention
- The management of learning and retention
- Knowing the world
- Observation and action
- Thinking and deciding
- Motivation and drive
- Emotion
- Reactions to frustration
- Mental health and therapy
- The individual and the group
- Communication and persuasion
1. **Understanding Marketing and the Marketing Process:**
Marketing Management and Marketing Philosophies. The goals of the marketing system. Strategic planning and the marketing process. The marketing management process and the marketing environment.

2. **Analyzing Marketing Opportunities:**
Market research and information systems; Consumer market and influences on consumer behavior.

3. **Marketing Strategy**
Market segmentation, targeting and positioning for competitive advantage.

4. **Developing the Marketing Mix:**
Designing products life cycle strategy; Pricing products; Pricing strategies. Placing product; Distribution channels retailing and wholesaling. Promoting products: marketing communication strategy, advertising sales promotion and publicity.
Introduction to Financial Management; Understanding financial management; Taxes; and cash flows; Evaluating a firm's financial performance; Financial forecasting planning; and budgeting; The time value of money; Risk and rates of return; Valuation and characteristics of bond; Stock Valuation; Capital-Budgeting decision criteria; Cash flows and other topics in capital budgeting; Capital budgeting and risk analysis; Cost of capital; Managing for shareholder value; raising capital in the financial markets; Analysis and impact of leverage; Planning the Firm's Financial mix; Accounting receivable and inventory management; Risk management; International business finance; Corporate restructuring; Combinations and Divestitures; Term loans and leases.
Cost accounting delves into advance treatment of costs with particular emphasis on cost records and their maintenance. It deals with the treatment of material, labor and overhead allocation and development; installation of standard costing and budgetary control system in an organization. Application of cost accounting in manufacturing and non-manufacturing concepts is explored.

**Course Contents:**

1. Concepts and objectives
2. Cost Accumulation procedure
3. Planning and control of the elements of cost
4. Budgeting and standard costing
5. Analysis of costs and profits

**ESSENTIAL TOPICS TO BE COVERED:**

a. Basic Database concepts  
b. Relational Database System: understanding, query and report  
c. Various problems in Database management and their solutions

**COURSE DESCRIPTION:**

Basic database concepts; Entity Relationship modeling, Relational data model and algebra, Structured Query language; RDBMS; Database design, functional dependencies and normal forms; Transaction processing and optimization concepts; concurrency control and recovery techniques; Database recovery techniques; Database security and authorization. Introduction to data mining, object oriented, distributed and multi dimensional databases. Small Group Project implementing a database

**Recommended Books:**

This course is designed to give the students an introduction to the concepts, methods & procedures of accounting. The subject matter includes the nature of accounts; recording changes in financial position; measuring business income & completion of accounting cycle. Accounting for merchandising concerns, financial assets, inventories & plant assets; preparation of classified & incorporated income statements are included in this basic course.

**EVOLUTION OF MONEY, FORMS & FUNCTIONS**

1. **Value of Money:**
   Quantity Theory of Money, Cash Balance theory of Money, Measurement of valued of Money
2. **Trade Cycle:**
   Phases, Causes, Remedies, Theory of Trade Cycle
3. **Inflation:**
   Kinds, Causes, Remedies, Deflation, reflection, Disinflation, Stagflation
4. **International Monitoring Systems:**
   IMF, IBRD, Asian Development Bank, Islamic Development Bank

**BANKING**

1. **Introduction:**
   Definition, Evolution, Kinds of Banks
2. **Commercial Bank**
   Principles, Function, Importance, Role of Banks
3. **Bank Account**
   Current, PLS, Tenn Deposit, Foreign Currency Accounts
4. **Bank Customers**
   Different Types of Customers, Bankers Customers Relationship
5. **Letter of Credit**
   Kinds, Operations, Advantages
6. **Central Bank**
   Principles, Functions, Role, Monitoring Policies, Method of Note Issues, State Bank of Pakistan, Functions and Role.
7. **Banking in Pakistan**
   Brief History, Nationalization, Privatization, ADBP, IDBP, Small Business Finance Corporation.
8. **Islamic Banking**
   Principles Functions, Islamic Modes of Finance
The course aim is to introduce visual environment and concepts applicable in windows operating systems. Students will be able to develop fundamental programming skills using the object oriented approach.

**Course Contents:**
1. Key words, identifiers, variable, constants.
2. Functions, procedures
3. Arrays strings
4. Abstractions, inheritance, polymorphism Program semantics
5. Templates
Course Contents:
Introduction: The concept of entrepreneurship, The economist view of entrepreneurship, The sociologist view, Behavioural approach, Entrepreneurship and Management

The Practice of Entrepreneurship: The process of entrepreneurship, Entrepreneurial Management, The entrepreneurial business, Entrepreneurship in service institutions, The new venture

Entrepreneurship and Innovation: The innovation concepts, Importance of innovation for entrepreneurship, Sources of innovative opportunities, The innovation process, Risks involved in innovation

Developing Entrepreneur: Entrepreneurial profile, Trait approach to understanding entrepreneurship, Factors influencing entrepreneurship, The environment, Socio cultural factors, Support systems

Entrepreneurship Organization: Team work, Networking organization, Motivation and compensation, Value system

Entrepreneurship and SMES: Defining SMEs, Scope of SMEs, Entrepreneurial, managers of SME, Financial and marketing problems of SMEs

Entrepreneurial Marketing: Framework for developing entrepreneurial marketing, Devising entrepreneurial marketing plan, Entrepreneurial marketing strategies, Product quality and design

Entrepreneurship and Economic Development: Role of entrepreneur in the economic development generation of services, Employment creation and training, Ideas, knowledge and skill development, The Japanese experience

Case Studies of Successful Entrepreneurs

Recommended Books
- Paul Burns and Jim Dew Hurst: Small Business and Entrepreneurship
- P.N. Singh: Entrepreneurship for Economic Growth
- Peter F. Drucker: Innovation and Entrepreneurship Peter F. Drucker
- John B. Miner: Entrepreneurial Success

**Objectives:**

This course will introduce students to small and medium business organizations.
- Small business and ownership.
- Small business firm and franchising.
- Establishing the firm management control.
- Marketing the product or service.
- Government and small business.

**Recommended Books:**
Objectives:

   - Administrative Factors
   - Education and Training
   - Social Factors
   - Political Factors

5. Transport & Communications: Development of means of Transport and Communication there role, effect and problems.

Recommended Books:
Objectives:
The primary goal of this course is to teach the techniques of integral calculus that is likely to be encountered in business and economics courses in college and in subsequent professional activities. The course is designed to provide a sound, intuitive understanding of the basic concepts without sacrificing mathematical accuracy. Student performance will be evaluated on group projects handed out in class, pop quizzes and term exams.

Course Contents:
Introduction to Ant- differentiation:
The indefinite integral integration by substitution area and the definite integral. Applications to business and economics, Integration by parts; integral tables. Review on integration.

Further Topics in Integration:
The definite integral as the limit of a sum improper integrals. Probability density functions numerical integration review on further topics on integration.

Functions of Two Variables:
Functions of two variables surfaces and level curves. Partial derivatives the chain rule; Approximation by the total differential relative maxima and minima. Lagrange multipliers. The method of least squares. Double integrals review on functions of two variables.

The Trigonometric Functions:
Introduction to trigonometric functions; Differentiation and integration of trigonometric functions; Additional applications involving trigonometric functions.

Differential Equations:
Differential equations an introduction; Second order differential equations; Difference equations; Reviewing differential & difference equations.

Recommended Books:
Objective:

Background
Management Accounting - An Overview.
Financial Accounting, Cost Accounting, Management Accounting
Contents of Management Accounting

Cost Behavior & Cost Volume Relationship
Variable & Fixed Cost
Determining Element of Fixed Cost in Semi Variable Cost
Cost Volume Profit Analysis
Break-even analysis

Costing Methods
Absorption costing & marginal costing
Absorption cost activity Based costing

Responsibility Accounting
Standard Costing
Basic Variance Analysis
Further Variance Analysis
Management Control System And Responsibility Accounting

Relevant Information & Decision Making
Relevant Costing & Decision Making
Decision Making with Uncertainly
Linear Programming

Accounting for Planning & Control
Budgeting: Profits, Sales, Cost, Expenses & Human Resources
Budgeting Expenditures & Cost
Budgeting Flexible Budgets

Objectives:

As the name indicates this course is taught to make the student understand in detail the meaning, requirements and essentials of sales management. The qualities needed by good sales manager and the different essential components related to sales.

- Behavioral forces in selling.
- Promotional mix of firm.
- Background of selling.
- Selling process.
- Industrial and retail selling.
- Sales management.

Recommended Books:
Objective:

This course introduces the student to the fundamental modes of marketing. The areas of study include analysis of the marketing environment; Marketing research & Information systems; Behavior of consumer & business marketing; Market segmentation; Targeting & positioning for competitive advantage, Product designing, pricing ,Planning & Promotion

Course Contents:

➢ The nature and scope of marketing
➢ Data collection
➢ Descriptive research
➢ Data analysis
➢ Special topics in data analysis

Recommended Books:
### Objective:
This course deals with the ways in which strategic thinking can be applied to Human Resource Management. It aims to provide students with opportunities to synthesize managerial strategy issues with HRM processes, in a considered and reflective manner. The course focuses on the way strategies can be formed and enacted in organizations, and on the internal and external environmental contexts from which human resource strategies emerge. It also deals with a range of contemporary issues in human resource management against a backdrop of new and changing people management practices. In this course how can people manage and enhance organizational performance? How can we integrate stakeholder concerns into organizational decisions and strategies? How can strategic thinking underpin HRM activities? What are the barriers to strategic thinking in organizations? What does it mean to be a HR professional? Students are given the opportunity to enhance their skills in teamwork, organizational analysis, problem solving and strategic thinking through fieldwork, case studies and seminars.

<th>Cr. Hrs</th>
<th>Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>BBA-409</td>
<td>Organizational Development</td>
<td>3</td>
<td>VII</td>
</tr>
</tbody>
</table>

**Objectives:**

This course examines the philosophy & practice of organizational development as it relates to employee involvement. We consider numerous strategies and perspectives on how to align the interests of employees with those of the organization. The course covers broad issues ranging from core ideology (mission, vision, values), to concepts of leadership and empowerment, to infrastructure considerations such as structure and culture, and to the application of change initiatives related to continuous improvement. The instructor attempts to relate the material to the current experiences of the students while creating a foundation for future career development. This is a very practical course that draws on current readings and on the experiences of the instructor and the students to generate a dialogue around these and related issues.

</tr>
</tbody>
</table>

### Objectives:

**Course Objective:**
This course is a continuation of statistics-I. Statistical techniques and their applications are studied in greater detail in this part. The main objective is to work with real life examples and exercises drawn from a range of business area.

**Course Contents:**

**Interval Estimation:**
Estimation and interpretation of a confidence interval. CI for population mean and population proportion. Boot trap method.

**Hypothesis Testing:**
Classified theory. Hypothesis testing using confidence interval. Classical hypothesis testing and its difficulties. Type I and type II errors.

**Analysis of Variance:**
Anova as a useful tool. Simultaneous interval, distribution and f- test. One way Anova two way Anova.

**Least Square:**
Methodology and technicalities of fitting a straight line to a scatter plot.

**Simple Regression:**
Simple regression mode. Use of confidence interval and justifying use of straight line under least square. Sampling variability.

**Correlation:**
Simple correlation and regression. Correlation in multiple regression and multi -co linearity.

**Goodness of Fit:**
Use of confidence interval in "Chi-square tests and null hypothesis chi-square tests for multinomial and independence.

**Recommended Books:**
Objectives:

**Course contents**

- Foundations of E-Business
- E-Marketplaces
- Networks & Web Technologies (HTML & ASP) intro
- Launching a Successful online Business
- Internet security (Standards Cryptography & Authentications)
- B2B & E-Government, E-Learning
- Online Advertising
- Retailing in E-Commerce
- Ecommerce Environment International, Legal & Ethics, electronic Payment System
- Risk Management & Business continuity

**Recommended Books:**
Objectives:

The broad aim of the course is to introduce the students with the core functional areas of Financial Institutions and detailed review of the services offered. As a part requirement of the course each student shall be assigned a Financial Institution for analysis of its services. This would be followed by a presentation and submission of research report on the related Financial Institution.

Course Contents:

Introduction to Financial Institutions and Financial System:

A global review, evolution, development of Financial Institutions in Pakistan, need and importance of Financial Institutions.

Financial Institutions:

Commercial banks special management concerns for commercial banks, saving & loan associations, international banking, third institution, life insurance Co's, pension funds, other financial institutions, investment banks, Finance Co's and Investment oriented intermediaries.

Structural Changes In The Financial Services Industry:

Financial trends into the 1990s. Financial statements of financial institution¹

Planning for Financial Institution:

Strategic planning process, Operating and Financial planning, financial innovations (new products).

An Overview of Credit Risk Management:

Evaluation of loan & Investments, managing problems loans, measuring interest rate risk..

Major Financial Institutions in Pakistan:
State bank, Commercial banks, DFI's, mutual funds stock exchange, in Mudaraba Co's. Investment banks, Islamic system of banking in Pakistan.

</tbody>
</table>

**Objectives:**

This course is the continuation of Financial Management-I. It aims at covering those topics which were not dealt with in the first part thereby giving students further exposure in the field of Financial Management.

**Course Contents:**

- Capital structure and leverage
- Dividend policy
- Common stock and the investment banking process
- Long term debt
- Hybrid financing preferred stock, leasing and options
- Working capital policy and short term credit
- Cash and marketable securities
- Accounts receivable and inventory management
- Mergers, Divestitures, Holding companies and LBO'S

**Recommended Books:**
Objectives:

Taxation Management includes a comprehensive coverage and treatment of taxes as related to business profits, allowance and education, capital gains depreciation problems and reserves. A thorough study of Income Tax Act, Sales Tax Act, Wealth Tax etc, from the core of this course.

Recommended Books:
Objectives:
To make students realize the forces of human psychology in the conditioning of consumer behavior. Also to give an understanding of how advertising works and its importance. Advertising is communication or telling people about your product, its price, availability and its differentiating quality. The consumers action will determine sales. Therefore both consumer behavior & advertising will influence the decision making process of the consumers.

Course Contents:

- Introduction to consumer behavior
- Consumer motivation
- Decision making process of the consumers
- Role of advertising in influencing consumer perceptions
- Advertising agency
- Campaign planning
- Setting advertising objectives
- Developing message strategy
- Electronic message tactics
- Message production
- Media, Newspaper, Sales promotion, Magazines, Public realigning, Television, Radio, Direct mail, out of home
