

**Institute of Zoology
Faculty of Life Sciences
University of the Punjab, Lahore**

Course Outline

Programme	BS Zoology	Course Code	ZOOL-306	Credit Hours	1
Course Title	Lab. Wildlife				
Course Introduction					
This course provides an in-depth exploration of the wildlife of Pakistan, examining protected areas, international conservation conventions, zoo regulations, threatened species, habitat ecology, and conservation strategies. Students will gain an understanding of the biodiversity of Pakistan, the challenges faced in wildlife conservation, and the policies and practices in place to protect and manage wildlife.					
Learning Outcomes					
On the completion of the course, the students will: <div><div>1. Understand the diversity and distribution of wildlife in Pakistan.</div><div>2. Explore the roles and significance of protected areas in wildlife conservation.</div><div>3. Examine international conventions and agreements related to wildlife conservation.</div><div>4. Study the rules and regulations governing zoos and captive wildlife.</div><div>5. Identify and understand the threats to species and their habitats.</div><div>6. Investigate habitat ecology and the principles of wildlife conservation.</div><div>7. Develop skills in conservation planning and management.</div></div>					
Course Content				Assignments/Readings	
Week 1	Birds’ identification Techniques				
Week 2	Preparation of student’s groups with equipment’s and field guides				
Week 3	Data collection from Campus birds (Species and Count)				
Week 4	Data analysis and interpretation exercises, Individual Group Data analysis for Species Richness, Relative Abundance, Census Index, Simpson Index, Shannon Weiner Index and Species Evenness				
Week 5	Data analysis and interpretation exercises, All Groups Data analysis for Species Richness, Relative Abundance, Census Index, Simpson Index, Shannon Weiner Index and Species Evenness				
Week 6	Visit to a local zoo to assess compliance with international standards				
Week 7	Study of Threatened species of Pakistan				
Week 8	Study of Threatened species of Pakistan				
Week 9	Study of Threatened species of Pakistan				
Week 10	Study of Threatened species of Pakistan				
Week 11	Field trip to a nearby protected area National Park and Natural history museum				
Week 12	Exercise on Animal Distribution Maps				
Week 13	Exercise on Animal Distribution Maps				

Week 14	Exercise on Animal Distribution Maps	
Week 15	Discussion on the effectiveness of international agreements	
Week 16	Discussion on Pakistan's national reports to international conventions	
Textbooks and Reading Material		
<ol style="list-style-type: none"> "Wildlife of Pakistan" by Tom Roberts "Field Guide to the Birds of Pakistan" by Richard Grimmett, Tom Roberts, and Tim Inskipp "A Guide to the Reptiles of Pakistan" by Muhammad Sharif Khan "The Mammals of Pakistan" by T.J. Roberts "Pakistan: A Natural History" by Richard F. Porter "Biodiversity of Pakistan" edited by Shahina A. Ghazanfar and Stephen A. Ghazanfar "Birds of Pakistan" by Z.B. Mirza "Freshwater Fishes of Pakistan" by Muhammad Naeem Khan "Butterflies of Pakistan" by Col. Muhammad Afzal Shabbir "The Large Mammals of Pakistan" by Asad R. Rahmani and Rafaqat Masroor "Conservation and Management of Wildlife in Pakistan" by Shehzad A. Mufti "Wildlife and Protected Areas of Pakistan: A Review" by A. Khan and M. Hassan Suggested Readings <ol style="list-style-type: none"> Wildlife and Biodiversity of Pakistan Lecture Notes by Prof. Dr. Zulfiqar Ali 		
Teaching Learning Strategies		
<p>Teaching a course on the wildlife of Pakistan can be engaging and educational by using a variety of learning strategies to cater to different learning styles and enhance student understanding. Here are some strategies to consider:</p> <p>Learning Objectives:</p> <ol style="list-style-type: none"> Understand the diversity and distribution of wildlife in Pakistan. Investigate habitat ecology and the principles of wildlife conservation. Develop skills in conservation planning and management. <p>Teaching Strategies:</p> <p>Teaching a course on the wildlife of Pakistan can be engaging and educational by using a variety of learning strategies to cater to different learning styles and enhance student understanding. Here are some strategies to consider:</p> <p>1. Interactive Lectures</p> <p>Use Multimedia: Incorporate videos, documentaries, and virtual tours to showcase Pakistan's diverse wildlife and habitats.</p> <p>Guest Speakers: Invite wildlife experts, conservationists, and researchers to give talks and share their experiences.</p> <p>2. Field Trips and Outdoor Activities</p> <p>Nature Walks and Field Trips: Organize visits to national parks, wildlife reserves, and natural habitats to observe wildlife in their natural environment.</p> <p>Wildlife Observation: Teach students how to use binoculars, field guides, and cameras for wildlife observation and documentation.</p> <p>3. Hands-On Activities</p> <p>Wildlife Photography: Encourage students to take photographs of local wildlife and create a photo journal or gallery.</p> <p>Specimen Collection and Study: Collect and study specimens (insects, plants, etc.) to understand their roles in the ecosystem.</p>		

4. Group Work and Collaboration

Group Discussions and Debates: Facilitate discussions and debates on topics such as wildlife conservation, human-wildlife conflict, and biodiversity.

Collaborative Presentations: Have students work in groups to prepare and present on various aspects of Pakistan's wildlife.

- Overview of the wildlife of Pakistan and its importance.
- Show a documentary clip on Pakistan's wildlife or general wildlife around the world.
- Discuss the main groups of wildlife found in Pakistan, including mammals, birds, reptiles, amphibians, and insects.
- Use diagrams, maps, and videos to illustrate different species and their habitats.
- Wildlife photography workshop where students learn techniques for photographing animals.
- Divide students into groups and assign each group a specific region of Pakistan to research its wildlife.
- Groups prepare a short presentation on the wildlife of their assigned region, including key species and conservation issues.
- Conduct a quick quiz or use flashcards to review key concepts.

By using these strategies, you can create an engaging and comprehensive course that helps students appreciate the diversity and importance of wildlife in Pakistan.

Assignments: Types and Number with Calendar

Group Presentations:

Objective: Foster collaboration and deeper understanding through research and peer teaching.

Strategy:

- Assign group projects on specific topics such as evolutionary relationships, ecological roles, or conservation issues.
- Require groups to prepare and deliver presentations, promoting peer learning.
- Incorporate peer assessment and feedback to improve learning outcomes and presentation skills.

Assessment

Sr. No.	Elements	Weightage	Details
1.	Midterm Assessment	35%	Written Assessment at the mid-point of the semester.
2.	Formative Assessment	25%	Continuous assessment includes: Classroom participation, assignments, presentations, viva voce, attitude and behavior, hands-on-activities, short tests, projects, practical, reflections, readings, quizzes etc.
3.	Final Assessment	40%	Written Examination at the end of the semester. It is mostly in the form of a test, but owing to the nature of the course the teacher may assess their students based on term paper, research proposal development, field work and report writing etc.
