

<b>Programme</b>	<b>B.Sc. (Hons.) Agriculture</b>	<b>Course Code</b>	<b>HORT-301</b>	<b>Credit Hours</b>	3(2-1)
<b>Course Title</b>	<b>PRINCIPLES OF FRUIT PRODUCTION</b>				
<b>Course Introduction</b>					
This course provides a comprehensive overview of the principles and practices of fruit production, from orchard establishment to post-harvest handling. Students will learn about the biological and environmental factors that influence fruit production, as well as the cultural practices and technologies used to optimize fruit quality and yield.					
<b>Learning Outcomes</b>					
Upon completion of the course, students will:					
<ol style="list-style-type: none"> <li>1. Gain awareness of the principles and physiology of fruit production.</li> <li>2. Understand the principles of fruit production, including climate and soil requirements, varietal selection, and breeding.</li> <li>3. Analyze the importance of proper planting, training, and pruning techniques for optimal fruit production.</li> <li>4. Explain the role of irrigation, fertilization, and pest management in fruit production.</li> <li>5. Identify and describe the major fruit production systems, including organic and conventional methods.</li> </ol>					
<b>Course Content</b>				<b>Assignments/Readings</b>	
<b>Week 1</b>	<b>Unit-I</b>				
	1.1 Introduction to fruit science 1.2 Importance of fruits				
	1.3 Source-sink relationship 1.4 Classification of fruits				
<b>Week 2</b>	<b>Unit-II</b>				
	2.1 Water relations				
	2.2 Fruit-bud formation				
<b>Week 3</b>	<b>Unit-III</b>				
	3.1 Initiation 3.2 History,				
	3.3 Developments. 3.4 Controlling factors				
<b>Week 4</b>	<b>Unit-IV</b>				
	4.1 Types of pollination 4.2 Fruit setting problems				
<b>Week 5</b>	<b>Unit-V</b>				
	5.1 Fruitfulness				

	5.2 Unfruitfulness	
<b>Week 6</b>	<b>Unit-VI</b>	
	6.1 Rest	
	6.2 Dormancy	
<b>Week 7</b>	<b>Unit-VII</b>	
	7.1 Biennial bearing	
	7.2 Causes and control	
<b>Week 8</b>	<b>Unit-VIII</b>	
	8.1 Fruit thinning	
	8.2 Parthenocarpy	
<b>Week 9</b>	<b>Unit-IX</b>	
	9.1 Seedless fruit formation	
	9.2 Harvesting methods	
<b>Week 10</b>	<b>Unit-X</b>	
	10.1 Plant Growth Regulators (PGRs),	
	10.2 Bud variations	
<b>Week 11</b>	<b>Unit-XI</b>	
	11.1 Mutations	
	11.2 Pre-harvest handling of fruits	
<b>Week 12</b>	<b>Unit-XII</b>	
	12.1 Maturity indices	
	12.2 Preparation for fresh market.	
<b>Week 13</b>	<b>Unit-XIII</b>	
	13.1 Propagation Techniques	
	13.2 Pruning and Training	
<b>Week 14</b>	<b>Unit-XIV</b>	
	14.1 Fertilization	
	14.2 Economic Aspects	
<b>Week 15</b>	<b>Unit-XV</b>	
	15.1 Profitability	

<b>Week 16</b>	<b>Unit-XVI</b>	
	16.1 Sustainability	
	16.2 Resource conservation in fruit production.	

**PRACTICAL**

<b>Week 1</b>	Identification of various developmental stages of buds	
<b>Week 2</b>	Fruit bearing habits	
<b>Week 3</b>	Training and pruning	
<b>Week 4</b>	Evergreen and deciduous fruit trees	
<b>Week 5</b>	Thinning of fruits	
<b>Week 6</b>	Harvesting methods	
<b>Week 7</b>	Practices to control irregular bearing	
<b>Week 8</b>	Preparation of PGR stock solutions	
<b>Week 9</b>	Applications of PGR	
<b>Week 10</b>	Different methods to break seed dormancy	
<b>Week 11</b>	Determination of soil pH	
<b>Week 12</b>	Visits to fruit orchards.	
<b>Week 13</b>	Planting Techniques	
<b>Week 14</b>	Pollination Management	
<b>Week 15</b>	Post-Harvest Handling	
<b>Week 16</b>	Sustainable Practices	

**Textbooks and Reading Material**

1. Chottopadhyay, T.K. (Ed.). 2003. A Textbook on Pomology, Vol. I: Fundamentals of Fruit Growing. Kalyani Publishers, Ludhiana, New Delhi, India.
2. Chottopadhyay, T.K. 2000. A Textbook on Pomology, Vol. II: Tropical Fruits. Kalyani Publishers, New Delhi.
3. Yadav, P.K. 2007. Fruit Production Technology. International Book Distributing Co. (Publishing Division), Lucknow, India.
4. Dugger, B.M. 2009. Plant physiology with Special Reference to Plant Production. Biblio Bazaar, LLC.
5. Jackson, D.I., N.E. Looney (Eds.). 1999. Temperate and Subtropical Fruit Production (2nd Ed.). CAB International Publishing, Wallingford, U.K.

**Teaching Learning Strategies**

1. Lectures
2. Discussions
3. Presentations
4. Quiz
5. Assignments

**Assignments: Types and Number with Calendar**

1. Explore the potential and ethical considerations of using genetic modification to enhance fruit quality, yield, and resistance to pests and diseases
2. Fruit production plan

**Assessment**

Sr. No.	Elements	Weightage	Details
1.	Midterm Assessment	35%	Written Assessment at the mid-point of the semester.
2.	Formative Assessment	25%	Continuous assessment includes: Classroom participation, assignments, presentations, viva voce, attitude and behavior, hands-on-activities, short tests, projects, practical, reflections, readings, quizzes etc.
3.	Final Assessment	40%	Written Examination at the end of the semester. It is mostly in the form of a test, but owing to the nature of the course the teacher may assess their students based on term paper, research proposal development, field work and report writing etc.
