

# Institute of Botany

Faculty of Life Sciences University of the Punjab, Lahore Course Outline Semester – I

| Programme  | BS Botany  | Course Code  | Bot-112  | Credit Hours  | 2  |  |  |  |  |
|--|--|--|--|---|--|--|--|--|--|
| <b>Course Title</b>  | Diversity of Plants (Theory)   |  |  |   |  |  |  |  |  |
| Introduction   |  |  |  |   |  |  |  |  |  |
| covering morpholo<br>including algae, fu<br>characteristics and<br>plant groups is well  | ts" course provides an<br>ogy, habitat, reproducti<br>ongi, bryophytes, pteri<br>roles in ecosystems. Th<br>l elaborated in this cour<br>ents, and field studies i   | on, and economic s<br>dophytes, gymnospone<br>collection, prepara<br>rse. A comprehensive<br>ncluded in this course                          | significance. This co<br>erms, and angiosper<br>ation, characterization<br>e understanding of p<br>se.   | burse explores vario<br>rms, emphasizing th<br>on, and identification                       | us groups,<br>heir unique<br>of various  |  |  |  |  |
|  |  | Learning Outo  | omes   |   |  |  |  |  |  |
| On the completion of the course, the students will be able to:   |  |  |  |   |  |  |  |  |  |
| Accurately identify major plant groups and their distinctive features  |  |  |  |   |  |  |  |  |  |
| <ul> <li>Describe the morphological and anatomical characteristics of various plant groups</li> <li>Evaluation the reproductive machanisms and life available of different plants</li> </ul>   |  |  |  |   |  |  |  |  |  |
| <ul> <li>Explain the reproductive mechanisms and life cycles of different plants</li> <li>Analyze the economic importance and industrial applications of various plants, particularly fungi and algae</li> </ul>   |  |  |  |   |  |  |  |  |  |
| <ul> <li>Analyze the economic importance and industrial applications of various plants, particularly fungi and algae</li> <li>Conduct fieldwork for learning plant species in detail</li> </ul>  |  |  |  |   |  |  |  |  |  |
| Course Contents  |  |  |  |   |  |  |  |  |  |
| <ul> <li>General account of learning plant diversity including morphology, habitat, reproduction and economic signification</li> <li>Algae its diversity and importance: <i>Chlamydomonas, Spirogyra, Chara, Pinnularia, Ectocarpus</i> and <i>Polysiphonia</i></li> <li>Fungi its diversity and importance: <i>Mucor, Penicillium, Phyllactinia, Ustilago, Puccinia</i> and <i>Agaricus,</i> their effects on crop production and industrial applications.</li> <li>Bryophytes its diversity and importance: <i>Riccia, Anthoceros, Funaria</i></li> <li>Pteridophytes its diversity and importance: Fossils and Fossilization, Major Groups and their Affinities, Psilopsida (<i>Psilotum</i>), Lycopsida (<i>Selaginella</i>), Sphenopsida (<i>Equisetum</i>), Pteropsida (<i>Marsilea</i>).</li> <li>Gymnosperms its diversity and importance: Dicots and Monocots</li> <li>Seed Habit: origin of seed habit, complexity of seed habit, adaptation of heterospory, retention and germination of single megaspore within a megasporangium.</li> </ul> |  |  |  |   |  |  |  |  |  |
| 1. Ali, S. I. and I  | Nasir, Y. (1995-to date)   |  | 8  | , Karachi.  |  |  |  |  |  |
| <ol> <li>Davis, P.H. ar</li> <li>Greuter, W., I<br/>P.C., Skog, J.<br/>nomenclature<br/>Missouri, July</li> <li>Judd, W.S., C</li> </ol>   | McNeill, J. Barrie, F.R<br>McNeill, J. Barrie, F.R<br>E., Trehane, P., Turland<br>( <i>Saint Louis Code</i> ) <i>d</i><br>– <i>August 1999</i> . Koeltz,<br>ampbell, C.S., Kellogg<br>Approach, Sinauer, US. | 963). Principles of A<br>., Burdet, H. M., De<br>d, N. J. and Hawksw<br>adopted by the Sixt<br>, Konigstein. (Regnu<br>, E.A., Stevens, P.F. | ngiosperm Taxonom<br>emoulin, V., Filguer<br>vorth, D. L. (2000).<br>eenth International<br>um Veg.138.) | y. Oliver & Boyd, L<br>ras, T.S., Niclson, D<br>International code of<br>botanical congress | D.H., Silva,<br>f botanical<br>St. Louis |  |  |  |  |

5. Levine, D. A. (2000). The Origin, Expansion and Demise of Plant Species. Oxford University Press.

6. Naik, V. N. (1988). Taxonomy of Angiosperms. Tata McGraw Hill Publishing Company, New Delhi.

- 7. Simpson, M. G. (2018). *Plant Systematics* (3<sup>rd</sup> edition). Elsevier Academic Press, UK. .(Latest edition)
- 8. Singh, G. (2016). *Plant Systematics*; An Integrated Approach (3<sup>rd</sup> edition), University of Dehli, India (Latest edition).
- 9. Stace, C. (1992). Plant Taxonomy and Biosystematics, Edward Arnold.
- 10. Takhtajan, A. (1986). Flowering Plant: Origin and Dispersal, Oliver and Boyd, Edinburgh.
- 11. Briggs, D.J. and Walters, S.M. (2016) *Plant Variation and Evolution*, Cambridge University Press & Assessment
- 12. Journal Articles/ Reports: Pakistan journal of Botany, Mycotaxon, Plant systematics and Evolution, etc.

## **Teaching Learning Strategies**

- Student Centered approach
- Lecture based Examination
- Assignments
- Class discussions
- Quiz

## Assignments: Types and Number with Calendar

Oral Presentations

Total marks:25

• Final group-work project

| Programme           | BS Botany                 | Course Code | Bot-112L | Credit Hours | 1 |  |  |  |
|---------------------|---------------------------|-------------|----------|--------------|---|--|--|--|
| <b>Course Title</b> | Diversity of Plants (Lab) |             |          |              |   |  |  |  |
| Lab Course Contents |                           |             |          |              |   |  |  |  |

- Collection, slide preparation, identification, and characterization of Algal specimens from different sources
- Collection, slide preparation, identification, and characterization of Fungal specimens from different sources
- Collection, identification, and characterization of Bryophytes collected from different localities
- Collection, identification, and characterization of Pteridophytes collected from different localities
- Collection, identification, and characterization of Gymnosperms collected from different localities
- Collection, identification, and characterization of Angiosperms collected from different localities
- Study of morphology and reproductive structures of the selected specimens

### **Teaching Learning Strategies**

- Lectures
- Student Centered approach
- Group Discussion
- Laboratory work
- Seminar/ Workshop

### Assignments: Types and Number with Calendar

- Lecture Based Examination (Objective and Subjective)
- Assignments
- Class discussion
- Quiz
- Tests
