Q.4 Read the following passage carefully and answers the questions given at the end. (25)

Of all the institutions that have come down to us from the past, none is, in the present day, so disorganized and derailed as the family. Affection of parents for children and of children for parents is capable of being one of the greatest sources of happiness, but, in fact, at the present day, the relation of parents and children, in nine cases out of ten, is a source of unhappiness to both parties and in ninety-nine cases out of a hundred a source of unhappiness to at least one of the two parties. The failure of the family to provide the fundamental satisfaction which, in principle, it is capable of yielding, is one of the most deep-seated causes of discontent which is prevalent in our age. The adult who wishes to have a happy relation with his own children or to provide a happy life for them, must reflect deeply upon parenthood and having reflected must act wisely.

The causes of family unhappiness in our day are of the most diverse sorts, psychological, economic, social, educational and political. Where the well-to-do sections of community are concerned two causes have combined to make women feel parenthood a burden, far heavier that it was ever felt to be in single women: on the other hand,

they decay of domestic services.

### SECTION - B

Read the following passage carefully and answers the questions given at the end. An archaeologist studies the past and from the evidence he can build up a picture of how people lived. He is able to reconstruct the daily lives of men and women who lived thousands of years ago by studying scientifically the things which those men and women have left behind them. He prepares lists and compares their weapons and tools, their pots, needles and combs, and the ruined home and graves in which these pre-historic possessions learn from these random survivals of the past? From the Weapons he judges the size of the animals their owners could kill; from the tools he sees what crafts they had mastered; from the pots, needles and combs he assesses the domestic skills and fashions of their wives, and from their graves, and more specially the objects found inside the graves, he understands primitive man's hopes and fears of an after-life. With the archaeologists' help it is now possible to give in some details about 9000 years of history in the Middle East, and to write a generally reliable account of human evolution going back some half-million years.

Questions:

- How does an archaeologist learn about the lives of men and women who lived thousands of years ago? (2) Describe in your own words some of the facts that an archaeologist learns from the objects of the pre-historic (2) To what extent has the archaeologist helped us in our daily study of world history? times? ii) assesses Give the meaning of the following words: i) primitive How does an archaeologist judge the size of the animals the prehistoric people killed for their needs? SECTION-B

Q. #4: Read the following passage carefully and answer the questions given at the end. (25) It is usual to speak of courage as of two kinds, physical courage and moral courage. The distinction is quite sound; for a man can have one without the other. By physical courage, we meant the courage to face physical danger, such as pain, wound, death etc. By moral courage we mean courage to face ridicule, hatred and public disapproval for the sake of what we believe to be right. A soldier, who can face shells and guns, may be unable to face the mockery of his companions. He is physically brave, but a moral coward. On the other hand, there are men who dare to defy public opinion for conscience sake, but who cannot face bodily torture. They are morally brave, but physically cowards. Moral courage is test of character. Danger and physical risks test our nerves and strength only. But it requires an exceptional man to overcome temptations to be dishonest when his children are starving at home to ignore the whisper of the vile temper when the rewards he holds out to him are so irresistibly tempting. True manliness is of the mind, not of the body. The body suffers for a time and forgets all about it. But the torture and the pain mind may continue for years. The man, who suffers patiently without complaining because he thinks he in the right, is truly brave.

How are the types of courage different? 2

What is meant by moral courage? 2

3. How is moral courage better than physical courage? 2

4. Give the meanings of the following words: i) ridicule ii) exceptional 2

Which courage do you regard as superior? 2

Make a precis of the passage given above. 15

Q. #5: Write a dialogue between father and his son who is living abroad and has not visited his family for three years. (15)

Translate the following passage into English.

ہر کام کرنے کے لئے ایک قاعدہ ہوتا ہے۔ ان تھیلوں کے بھی ضابطے اور قاعدے مقرر ہیں۔ ٹیم کے ہر ممبر کا فرض ہے کہ وہ ایمان داری کے ساتھ ان کی پابندی کرے۔ پہی وہ بات ہے جو انسان کو انسان بناتی ہے۔ ان تھیلوں میں اگر کوئی جھگڑا ہو جائے تو اس کا فیصلہ امپائز کر تا ہے۔ اس کا فیصلہ قانون کی حیثیت رکھتا ہے۔ جے توڑنے کی کوئی جر آت نہیں کر سکتا۔ حکومت کا دارو ہدار بھی اس پر ہے۔ اگر ہر خیض ایٹی بی رائے پر چلے اور حکومت کے احکام کونہ مانے تو پھر سلطنت کے کاروبار کیو تکر چلیں؟ قانون کے بغیر ندامن قائم روسکتا ہے اور ندی تھی آزاد گی۔

### PROSE (A) (ATTEMPT ANY 1 OUT OF GIVEN 2 QUESTIONS)

### Q 1) Bitte übersetzen Sie ins Englische!

#### Der Verkehrsunfall

Die beiden Menschen, die eine breite, belebte Straße hinaufgingen, gehörten ersichtlich einer bevorzugten Gesellschaftsschicht an, waren vornehm in Kleidung, Haltung und in der Art, wie sie miteinander sprachen, trugen die Anfangsbuchstaben ihrer Namen bedeutsam auf ihre Wäsche gestickt, und ebenso, das heißt nicht nach außen gekehrt, wohl aber in der feinen Unterwäsche ihres Bewusstseins, wussten sie, wer sie seien und dass sie sich in einer Haupt- und Residenzstadt auf ihrem Platze befanden. Diese beiden hielten nun plötzlich ihren Schritt an, weil sie vor sich einen Auffauf bemerkten. Schon einen Augenblick vorher war etwas aus der Reihe gesprungen, eine querschlagende Bewegung; etwas hatte sich gedreht, war seitwärts gerutscht, ein schwerer, jäh gebremster Lastwagen war es, wie sich jetzt zeigte.

#### Q 2) Bitte übersetzen Sie ins Englische !

Der Kaukasische Kreidekreis

Vertreter zweier kaukasischer Kolchosen treffen sich nach der Vertreibung der deutschen Wehrmacht und diskutieren das Nutzungsrecht an einem Tal. Der Ziegenzuchtkolchos hat ältere Rechte an dem Land. Er erkennt jedoch den Plänen des Obstbaukolchos größeren gesellschaftlichen Nutzen zu und verzichtet auf das Tal. Nach der Einigung sollen die Beteiligten mit einem Theaterstück unterhalten werden. Der Sänger Arkadi Tscheidse kündigt das Spiel vom Kreidekreis an: nach einer Sage aus dem Chinesischen, aber in geänderter Form. Der reiche Gouverneur Georgi Abaschwill besucht am Ostersonntagmorgen mit seiner Frau Natella und dem Kind Michel die Messe. Selbstzufrieden nimmt der Gouverneur dabei auch die Ehrerbietung des Fürsten Kazbeki entgegen, der die Gefahr einer drohenden Niederlage im Persischen Krieg herunterspielt. Ein Bote versucht, Nachrichten vom Kriegsschauplatz zu überbringen, wird aber vom Gouverneur nicht angehört.

Hab ich denn eher wiederkommen wollen? Und wiederkommen können?

Babylon Ist von Jerusalem, wie ich den Weg, Seitab bald rechts, bald links, zu nehmen bin Genötigt worden, gut zweihundert Meilen;

Auch kein Geschäft, das merklich födert, das So von der Hand sich schlagen lässt.

Wo sie Väter hoch verehrten, Jeden fremden Dienst verwehrten; Will mich freun der Jugendschranke: Glaube weit, eng der Gedanke, Wie das Wort so wichtig dort war, Well es ein gesprochen Wort war...
