

## NOTE

If a candidate has applied for more than one position and their subject is the same for example a candidate holding an MS in Chemistry who has applied for the posts of Junior Forensic Scientist (Latent Fingerprint) and Junior Forensic Scientist (Toxicology), then only one roll number slip will be issued. However, the marks obtained in the test will be considered for all positions related to that subject.

Furthermore, if a candidate has applied for multiple positions with different subjects, a separate roll number slip will be issued for each subject.
