

One day Workshop on

ETHICAL CHALLENGES IN BIOMEDICAL RESEARCH

23rd May 2015

Venue

Department of Microbiology and Molecular Genetics, University of the Punjab, Lahore

INTRODUCTION

Recent advancements in the field of science, like creation of 3-parents embryos¹, conception of gametes from the skin cells² and many other emerging technologies has raised voluminous ethical challenges in the current era. However, it has been felt that understanding on how to deal with these emerging ethical problems is widely lacking among the researchers and health professionals in the country.

What this workshop aims at?

This workshop aims at sensitizing the participants about ethical approaches of biomedical research. It will also focus on highlighting some ethical challenges that biomedical researchers may come across.

Who should attend?

- Graduate & Postgraduate biomedical students
- Faculty members & Researchers

1. Is it ethical to create babies from three DNA sources? Absolutely. Available at: <http://www.wired.com/2015/02/ethical-create-babies-three-dna-sources-absolutely/>

2. Stop fretting about 3-parent embryos and get ready for "multiplex parenting". Available at: http://www.bioedge.org/index.php/bioethics/bioethics_article/10882
