

Program educational objectives (PEOs)

The graduates from the Institute are expected to meet the following program educational objectives through our educational structure:

PEO1: Apply knowledge and skills as professional Chemical Engineers and entrepreneurs in process and allied industries, academic and research organizations for sustainable development of society.

PEO2: Advance knowledge through training, research, modern tools usage, and lifelong learning.

PEO3: Communicate effectively and lead projects to devise viable and environmentally friendly solutions for engineering problems observing ethical practices.
