Curator Note:

Since human history textiles existed in diverse manners from numerous sources fulfilling a basic human need “clothing”. Textiles have been part of human life for functional as well as decorative purposes. Use of multiple creative ways has made this everyday usable item a medium for human expression. Creative executions are practiced across generations and endured the test of time through centuries. Creativity among the available vast array of contemporary and traditional materials has countless possibilities in its visual representation. The Fiber Art Exhibition 2023; third of its kind, is the collection of amazing art works created by the fiber artists of the Textile Design Department, University of the Punjab. The platforms showcase a wide range of artistic expressions of participants who have selected from a wide variety of textile fibers and materials as their medium of expression. The uniqueness of this show is that most of the artwork is produced for a community awareness campaign as Awareness of Traffic Rules. It is a great initiative to produce thematic work that extends beyond the boundary of artistic expression and embeds a purposefulness through this expression. The overall aura of the show provides a deeper perception of colors, shapes , forms, and textures all assembled together to address a current cause to raise awareness of traffic rules among the community. Manually created textile surfaces for the specific theme with use of numerous historic and contemporary fabric rendering techniques bring into limelight the enormous potential of the arena of Fiber Art. All participants are seasoned practitioners of the chosen field. Their passion for exploration and pushing the boundaries of practice of his specific niche of textile surface creation is reflected well in the contributory artworks. It is indeed a step towards bringing textile art forms into the local mainstream art scene and bringing the artist and community closer. Hoping for similar meaningful endeavors in future to explore horizons of creativeness of Fiber Art. I congratulate and wish the best of luck to all the participants.
