# FIBER ART EXHIBITION

## Curator's Note:

The Fiber Art Exhibition proudly returns with its 5th edition, continuing its journey as a vibrant celebration of creativity, experimentation, and artistic expression in textile art. First launched in 2021 at the Textile Design Department, College of Art and Design, PU, the exhibition has grown into a significant annual platform that brings together textile artists from across the region. Over the years, it has encouraged artists to explore new ideas, challenge conventions, and redefine the possibilities of fiber as an artistic medium.

This year's edition highlights an exciting range of works that reflect both innovation and refined craftsmanship. Textile artists have explored diverse techniques, materials, and processes, seamlessly blending traditional practices with contemporary concepts. From intricate hand embroidery and surface manipulation to experimental installations and digital fiber art, the exhibition showcases the remarkable versatility and expressive potential of textiles. Each piece reflects a thoughtful engagement with material, technique, and concept, revealing the artists' deep understanding of fiber art and its evolving role in contemporary creative practice.
