

Seminar Invitation: A methodology for selection of rehabilitation center with m-polar fuzzy N-soft sets

Speaker: **Maheen Sultan** from Department of Mathematics, University of the Punjab, Lahore

Abstract

Fuzzy soft set theory has revolutionized data analysis by exploring and extracting valuable insights from imprecise data and the parameterized family of attributes. M-polar fuzzy N soft sets combine the parameterized family of attributes along with N-ordered grading in m-polar information. A multi-criteria decision-making technique is being combined with m-polar fuzzy N-soft sets to select the most optimal option. A practical application of selecting a rehabilitation center is being considered to analyze the practicality of m-polar fuzzy N-soft sets.

Speakers' Brief Introduction

Ms. Maheen Sultan is a Ph.D. scholar working under the supervision of Prof. Dr. Muhammad Akram.

40th Departmental Seminar Series

The Seminar Series serves as a platform to showcase and celebrate the remarkable work carried out by our researchers, scholars, and experts. It provides an avenue for knowledge dissemination, and collaboration, creating an environment that nurtures innovative ideas and drives recent research.

The Seminar Series encompasses a wide range of topics, spanning various disciplines, ensuring that it caters to the diverse interests and expertise of our institute's community. Through these seminars, we aim to cultivate an environment of intellectual curiosity, stimulating meaningful discussions, and promoting interdisciplinary collaborations.
