Abstract

Poetry has been a basic source for vocabulary and compounds and their usage in Arabic language since long. The tradition of inference for the understanding and perseverance of Arabic vocabulary, etymology, sentences construction and rhetorical styles with reference to the holy Qur'an was established in the life of Prophet's companions. Abu Ubaida's Qur'anic commentary "Majaz al-Qur'an" is replete with reference of verses, proverbs and idioms. This paper is an analytical study of the verses employed by great linguist and commentator of the holy Qur'an, Abu Ubaida, with special reference to Sura "Al-Fateha".
